

Brand Guide

About This Document

This is the primary guide for the brand identity and supporting design assets for OpenJelly, a project made possible through the help of Gitcoin GG20 and the Web3 community.

The typefaces in this document are open-source fonts, ensuring accessibility across all operating systems.

All images have been created specifically for this project, or derived from source material subject to a Creative Commons Attribution-ShareAlike License.

This document and assets are a foundation for other designers to create great work. If you use it, share your projects by posting a link in the comments of the README file.

This work is licensed under the Creative Commons Attribution-ShareAlike License, which allows for redistribution, remixing, transformation, and building upon the material for any purpose, even commercially, as long as you credit the original creation and license your new creations under the same terms.

Imagery

Logo

This is the main, default logo.
It's the one to use, unless context requires
either the logotype or the brand mark.

Logotype

Just the text.
Stacked or horizontal orientation.

**OPEN
JELLY**
OPENJELLY

Mark

Just the symbol.

**OPEN
JELLY**

OPENJELLY

**OPEN
JELLY**

OPENJELLY

Badges

Let your shortcut, website, or app wear one with pride, including wherever you publish (RoutineHub)

Clear space and minimum size

Always give the logo room to breathe. The empty space around the logo should be no smaller than the width of the jellyfish mark.

40 PIXELS

32 PIXELS

24 PIXELS

16 PIXELS

To ensure the brand is always identifiable, use the mark (just the jellyfish) in the the smallest sizes. Never go smaller than 16 pixels wide. Use a vector version whenever possible.

Color

...or a lack of.

Why gray?

It's a base coat. A neutral unifier. A layer of primer so now it's ready for any color of paint that might get applied just as OpenJelly is serves as the base for whatever comes next.

Imagery

Keep it simple, but not simplistic. A handmade, low-fi aesthetic from a nearby universe where everything is super rad.

A Midjourney prompt might be something like:
abstract subtle swirl texture, photocopy of gridpaper subtle grain texture risography effect, photocopy of gridpaper subtle grain texture risography effect, black and white, grainy depth of field.

Imagery, continued...

Subtle **textures** can be used in place of, in addition to, or along side other imagery. These should be without a subject and simple enough that they could be placed under text without substantial loss of legibility.

Imagery, continued...

Seamless repeating patterns

can also be used in place of, in addition to, or along side other imagery. Like the texture backgrounds, these should also be without an identifiable subject and simple enough that they could be placed under text without substainal loss of legiblity.
